

ODMS CLOUD

SPEECH RECOGNITION PACKAGE

BACKGROUND SPEECH RECOGNITION

STREAMLINE YOUR TRANSCRIPTION WORKFLOW

now includes background speech recognition, instantly converting dictations to text upon upload. No delays—just faster workflows and improved productivity. Subscribe today to unlock this powerful feature.

INSTANT

Files uploaded to the Cloud from DS Series Recorders or the App are automatically converted into text using AI Speech Recognition, based on your workflow settings.

SIMPLICITY

High accuracy is ensured with Speech-to-Text conversion powered by Microsoft Azure AI.

EFFICIENT

The Text Correction Window allows transcriptionists to easily proofread and finalize documents with greater accuracy and efficiency.

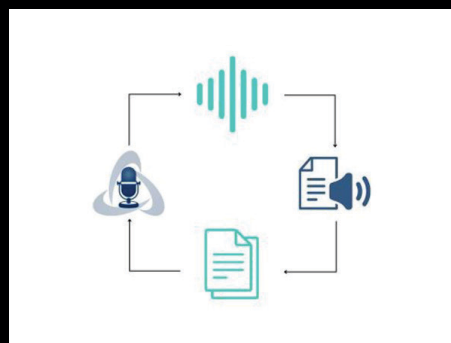

UNLIMITED

Enjoy unlimited use of Speech Recognition with an annual subscription. Contact your local dealer for pricing details.

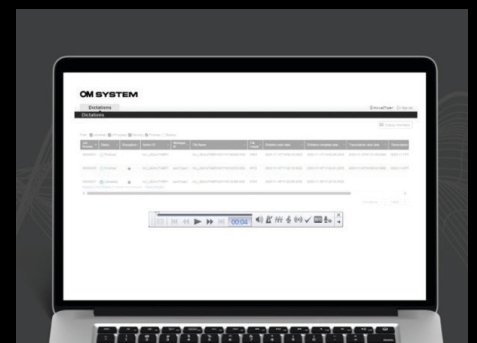

SEAMLESS TRANSCRIPTION WITH CLOUD-BASED SPEECH RECOGNITION

Users upload dictation files—our cloud handles the rest. With background speech recognition, audio is converted to text for faster workflows and better documentation. Upload directly from DS recorders or the ODMS Cloud App for a seamless, efficient process.

SMART ROUTING FOR SPEECH RECOGNITION

Our cloud-based speech recognition solution automatically converts dictation files uploaded from your device or app. If the author has a speech recognition license and the routing rules set by the user designate those files for transcription, they will be processed with speech recognition for fast, accurate results.

TAILORED TRANSCRIPTIONS FOR MEDICAL & LEGAL PROFESSIONALS

Our cloud-based background speech recognition goes beyond transcription—it inserts results directly into your custom document templates. Whether you're creating patient reports or legal briefs, transcriptionists save time and reduce errors by working within pre-formatted, industry-specific layouts.

AI THAT UNDERSTANDS YOU NO COMMANDS NEEDED

Our cloud-based AI adds punctuation automatically—no need to say “comma” or “full stop.” Dictation feels natural and effortless, saving time and easing the workload for transcriptionists and professionals alike.

EDIT SMARTER TEXT CORRECTION WINDOW

Perfecting transcriptions just got easier. The Text Correction Window highlights text in real time as audio plays, making it easy to spot and fix errors. Foot pedal controls speed up review, creating a smooth, efficient editing experience.

SMART SPEECH RECOGNITION MEETS SMARTER PRICING

Say goodbye to unpredictable costs. Our cloud-based background speech recognition offers a flexible subscription model—with unlimited usage when you subscribe for 12 months. Enjoy consistent pricing, scalable performance, and automatic access to the latest features, all without hidden fees.

MULTILINGUAL SUPPORT ADVANCED ACCENT RECOGNITION

Transcribe with confidence in English, German, French, and Spanish. English includes US, UK, and Australian/NZ accents for greater accuracy across regions. Break language barriers with seamless, accent-aware speech recognition.

SUBSCRIPTION

ODMS Cloud streamlines budgeting with its subscription-based model, eliminating upfront costs. Each 12-month license offers financial predictability and includes 5GB of cloud storage per user for seamless collaboration. This supports efficient resource use, cost control, and stronger teamwork. A Speech Recognition Package is available as an add-on, with upgrade options for licenses with 90 days remaining—offering flexibility as organizational needs grow.
