

Product Specifications

Evolution Eye Wash Station

- **Highly Visible & Accessible** – Our wall-mounted design makes this eye wash station very visible, clearly displaying all supplies for quick access when needed.
- **More Safety, Less Plastic** – A reduced volume of plastic was used in the manufacture of this station compared with others, however, it's very durable and still packed with all of the essential eye safety supplies.
- **Contents Comply with British Standard** – Equipped with 2 x 500ml bottles of sterile saline, 8 x 20ml sterile saline eye wash pods and 2 x sterile eye dressings.
- **Made in Britain** – Our patented eye wash stations are made in the UK, requiring less transportation, leading to lower carbon emissions and better stock availability.
- **Dimensions** – 7.2 cm x 20.8 cm x 14.5 cm.

The **Evolution Eye Wash Station** is a comprehensive eye irrigation solution designed to support first aid provision in larger or higher-risk environments. Manufactured to the same high standards as the Evolution range, the station provides immediate access to eye wash products to support prompt treatment following eye contamination or injury. The unit is supplied with 8 x 20ml sterile eye wash pods and 2 x 500ml sterile eye wash bottles, providing a combined total of 1.16 litres of 0.9% saline solution. This combination allows for both rapid initial flushing and extended irrigation when required, supporting effective and hygienic eye care in demanding workplace settings.

Key Benefits

- **Can be used for both major and minor injuries** – with the inclusion of both larger eye wash bottles and smaller pods, there is irrigation available for a wide range of injuries. Once a bottle has been opened the contents are no longer sterile, so any liquid not used must be disposed of, whereas the pods allow a small amount of eye wash to be used while maintaining the sterility of other pods.
- **Mirror included in the station** – to support safe and easy self-administration during eye emergencies there is a mirror located on the station.
- **Compact design** – ideal for storing alongside other first aid kits, even in areas with size constraints.
- **Rapid response for eye injuries** – with the inclusion of both sterile saline solution and eye dressings, this station ensures that irrigation and dressing can take place immediately after an injury.
- **Wall-mountable** – the eye wash station easily screws into the wall (screws not included). This allows for easy access and clear visibility for anyone in the vicinity.
- **Part of the Evolution Series** – this station is created to the same high standard as other Evolution products, all of which are durable, fully recyclable and made in the UK.
- **Meets legal requirements for workplaces** – Ensures workplaces have over 1 litre of sterile saline solution on hand, meeting HSE guidance for workplace first aid provisions.

Station Contents

- 8 x HypaClens Sterile Eye Wash Pods, 20ml
- 2 x HypaCover Sterile Eye Dressings
- 2 x HypaClens Sterile Eye Wash Bottles, 500ml

Contents Compliant with New British Standard With updated British Standard guidance now requiring greater provision of workplace eye wash, workplaces need simple, all-in-one solutions they can trust. Our newly launched Evolution Eye Wash Stations combine compliance and accessibility in one highly visible system. Designed to support BS 8599-1:2019+A1:2026 requirements, they ensure workplaces have immediate access to sterile eye wash and eye dressings, helping minimise the impact of eye injuries and supporting a safer workplace for everyone. **HSE Eye First Aid Guidance** According to HSE regulations, laid out in The Health and Safety (First-Aid) Regulations 1981, if there is no tap water available, then workplaces are required to have at least 1 litre of sterile water or sterile saline (0.9% w/v) solution available in sealed containers.

About Evolution The Evolution Series provides first aid
