

Product Specifications

Evolution Eye Wash Pod Station

- **Compact Size** – Our compact eye wash pod station is ideal for areas where space is limited, or as a supplement to existing eye wash provisions.
- **Includes Sterile 0.9% Saline Solution** – Supplied with 10 x 20ml eye wash pods containing sterile saline solution and 2 x HypaCover Sterile Eye Dressings.
- **Precise Eye Flushing** – Saline pods offer more precise irrigation to remove debris and soothe irritation than a large bottle.
- **Made in Britain** – Our patented eye wash stations are made in the UK from fully recyclable plastic, requiring less transportation, leading to lower carbon emissions and better stock availability.
- **Dimensions** – 3.7cm x 22.5cm x 14.8cm.

The **Evolution Eye Wash Pod Station** is a compact and fully recyclable eye wash solution, manufactured to the same high standard as the wider Evolution range. Designed to provide immediate access to eye irrigation in the event of contamination or irritation, the station offers a practical and hygienic first aid response for workplace and commercial environments. The unit is supplied with 10 x 20ml pods of sterile 0.9% saline solution, delivering a total volume of 200ml for effective, precise flushing of the eyes. Each pod is individually sealed to maintain sterility and ensure controlled, single-use application, supporting prompt and reliable treatment when required. Suitable for wall mounting in accessible locations, the Evolution Eye Wash Pod Station is an efficient and space-saving addition to any first aid provision.

Key Benefits

- **Contains sterile eye wash pods** – these are ideal for instances when you need to irrigate eyes with precision and do not require the use of a full bottle. The single-use pods help minimise waste and ensure the solution remains sterile for each application.
- **Easily portable solution** – the pods are easily transported to the scene of injury as they are lightweight and sealed preventing spills and a prolonged wait.
- **Includes a mirror** – to support safe and easy self-administration during eye emergencies, there is a mirror located on the station.
- **Compact design** – ideal for storing alongside other first aid kits, even in areas with size constraints.
- **Ideal for providing quick first aid for eyes** – with the inclusion of both sterile saline solution and eye dressings, this station ensures that irrigation and dressing can take place immediately after an injury.
- **Wall-mountable** – the eye wash station easily screws into the wall (screws not included). This allows for easy access and visibility for anyone in the vicinity.
- **Part of the Evolution Series** – this station is created to the same high standard as other Evolution products, all being durable, fully recyclable and made in the UK.
- **Contributes to workplace first aid requirements** – this station contains 200ml of sterile saline solution, contributing to the litre that is advised under HSE guidance.
- **Long term cost saving** – providing an on-site eye wash station will save money by providing saline solution in bulk and potentially limit the amount of time a worker would require off if the injury was left untreated.
- **Low maintenance** – by using eye wash pods, this station doesn't require the same level of cleaning and frequent inspections that a plumbed-in station would. The pods are ready to use straight from the packaging.

Station Contents

- 10 x HypaClens Sterile Eye Wash Pods, 20ml
- 2 x HypaCover Sterile Eye Dressings
