SEMBLY AI

Discreet recording, made simple

Turn recordings into text and AI meeting notes

A fully functional ballpoint pen and professional audio recorder in one, the Philips VoiceTracer lets you write notes by hand while capturing every spoken word. Its sleek, discreet design and built-in 360° microphone blend seamlessly into any meeting, interview, or lecture. Equipped with 20 hours of battery life and 32 GB of storage for up to 250 hours of audio, it handles your busiest workdays. Connect the recorder to your computer via USB-C and let Sembly Notes AI automatically turn your recordings into text and structured meeting summaries.

Clear, reliable recording

- 360° microphone for clear, high-quality recordings
- One-touch recording for quick and easy operation
- 32 GB memory for up to 250 hours of recording

Designed for everyday use

- Fully functional writing pen with discreet recording and easy portability
- Built-in USB-C connection for easy file transfer
- Up to 20 hours of battery life for extended recording

Turn recordings into text and notes

- Automatic transcription with Sembly for fast speech-to-text conversion
- AI-generated meeting notes with Sembly for easier follow-up
- Easy sharing of recordings and transcripts with Sembly

Highlights

High-quality 360° microphone

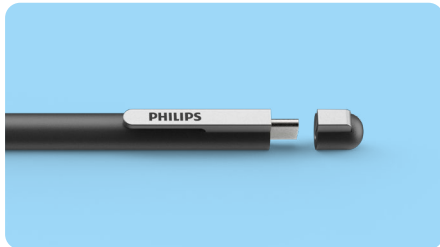

The built-in 360° microphone captures sound from all directions, making it ideal for recording notes, conversations and meetings at your desk or on the go.

One-touch recording

The recording button is discreetly integrated into the pen's clip, keeping it easily accessible while preserving the pen's sleek design. Simply press the button to start recording and use the same button to stop when you are done.

32 GB for up to 250 hours of recording

The built-in 32 GB memory stores up to 250 hours of recordings, providing plenty of capacity for meetings, conversations and personal notes without frequent file transfers.

Discreet and ergonomic design

Designed as a fully functional writing pen, its slim, lightweight body enables discreet recording while remaining comfortable to write with. It fits easily in a pocket, briefcase or bag, and the practical clip allows convenient hands-free recording.

Easy USB-C file transfer

Connect the recorder directly to your PC or Mac to play back or transfer recordings, with no additional software required. The recorder can also be used as a USB storage device.

Up to 20 hours of battery life

Record for up to 20 hours on a single charge, providing enough power for a full day of meetings, interviews or lectures. If the battery runs out during recording, the current recording is automatically saved before the device switches off.

Automatic speech-to-text

Turn recorded audio into searchable text without typing. Upload meetings, interviews or voice notes to Sembly AI to automatically generate transcripts, with multi-speaker identification to see who said what.

AI-generated meeting notes

Use Sembly to turn meeting recordings into structured AI-generated notes and summaries, with clear next actions and to-dos, so you can focus on the conversation instead of taking notes.

Easy sharing

Use Sembly to export transcripts as PDF or Markdown, or share recordings and transcripts with others via a link. Shared links can be password-protected for additional privacy.
